

Instructions

1. Make revisions and corrections to Project 3, as needed, in InDesign (digital files only -- no paper output, no mounting).

2. Then, make a PDF file from your InDesign publication. Before you create the PDF file, be sure your InDesign pages appear in this order:

front cover
two-page spread #1
two-page spread #2
two-page spread #3
two-page spread #4
back cover

In InDesign, your Pages window should look exactly like the example on the right.

Notes

1. This will produce a 10 page PDF file.

2. You do not need to have (or add) page numbers to your document; just be sure the pages are in the same order as those in the example.
